Bilten Centralne banke Crne Gore predstavlja mjesečnu publikaciju koju priprema Centralna banka Crne Gore. Bilten je pregled najvažnijih statističkih podataka koji predstavljaju dobru bazu za sadašnje i buduće analize kretanja u crnogorskom bankarstvu i privredi. Osnovni akcenat je na podacima čiji je izvor Centralna banka Crne Gore, vezanim za monetarna kretanja, bankarski sistem, platni bilans i platni promet. Takođe je napravljena statistička baza drugih makroekonomskih pokazatelja iz realnog i fiskalnog dijela, emisije državnih zapisa i tržišta kapitala, kao i neki uporedni podaci o zemljama koje su u procesu Evropskih integracija. Sadržajno se sastoji iz dva dijela: kratkog pregleda kretanja i statističkog pregleda sa metodološkim objašnjenjima tabela.

The Bulletin of Central Bank of Montenegro is a monthly publication prepared by the Central Bank of Montenegro. Bulletin has been envisaged as an overview of the most important statistical data that represent a good base for current and future analyses of developments in the Montenegrin banking system and economy. The emphasis was put on data whose source is the Central Bank of Montenegro and which are related to monetary developments, banking developments, the balance of payments, and the payment operations. There is also a statistical base of other macroeconomic indicators in the real and the fiscal sphere, issued Treasury bills and the capital market, as well as some comparative data on countries undergoing the European integration process. The content consists of two parts: a short overview of developments and a statistical overview with methodological explanations of tables.

Budžet Crne Gore

Izvorni prihodi budžeta Crne Gore i državnih fondova u julu 2024. godine, prema procjeni Ministarstva finansija, iznosili su 259,96 miliona eura ili 3,70% procijenjenog BDP-a⁴ i bili su viši za 8,39% u poređenju sa planiranim, a za 25% u poređenju sa julom 2023. godine.

U strukturi izvornih prihoda, u julu, najveće učešće, 67,81%, ostvarili su prihodi od poreza, zatim doprinosi 21,16%, ostali prihodi 6,52%, naknade 2,59%, donacije 1,22% i takse 0,69%. Prihodi od poreza, u julu, bili su viši za 9,31% u odnosu na plan, a u poređenju sa istim mjesecom prethodne godine ostvarili su rast od 22,75%, pretežno uslovljen većom naplatom poreza na dodatu vrijednost. Tako je naplata ove kategorije poreza bila veća za 14,44 miliona ili 13,75% od planirane, a za 26,72 miliona eura ili 28,83% od evidentirane naplate u julu prethodne godine, što je rezultat dinamike povraćaja PDV-a koja je od početka godine ubrzana od strane Poreske uprave, imajući u vidu akumulirane iznose zahtjeva za povraćajima iz prethodnog perioda.

Konsolidovani rashodi budžeta (ukupni izdaci umanjeni za otplatu dugova), u julu 2024. godine, iznosili su 248,44 miliona eura ili 3,53% BDP-a, što je manje za 6,14% u odnosu na plan, a u poređenju sa istim mjesecom prethodne godine veće za 11,05%. Najveće apsolutno odstupanje od plana zabilježeno je kod rezervi (pad od 9,31 milion eura), dok poređenje sa julom prethodne godine pokazuje najveće apsolutno odstupanje kod prava iz oblasti penzijskog i invalidskog osiguranja (rast od 14,48 miliona eura), uzrokovano povećanjem minimalne penzije.

Najveće izvršenje rashoda zabilježeno je kod penzija (61,55 miliona eura) i bruto zarada (56,27 miliona eura).

U julu kapitalni izdaci iznosili su 21,93 miliona eura.

Budžet Crne Gore, u julu 2024. godine, zabilježio je *suficit* od 11,52 miliona eura ili 0,16% BDP-a.

⁴ *Ministarstvo finansija: procijenjeni BDP za 2024. godinu iznosi 7.279,70 miliona eura.*

Budget of Montenegro

According to the Ministry of Finance estimates, *current revenues* of the Budget of Montenegro and state funds amounted to 259.96 million euros or 3.70% of the estimated GDP⁴ and they were 8.39% higher than planned and 25% higher than in the same month last year.

In the structure of current revenues, tax revenues accounted for the main share of 67.81%, followed by contributions with 21.16%, other revenues with 6.52%, fees with 2.59%, donations with 1.22%, and duties with 0.69%. Tax revenues in July were higher by 9.31% compared to the plan, and compared to the same month of the previous year, they achieved a growth of 22.75%, mainly due to higher collection of value added tax. Thus, the collection of this tax category was higher by 14.44 million euros or 13.75% than planned, and by 26.72 million euros or 28.83% of the recorded collection in July of the previous year, which is the result of the dynamics of VAT refunds which has been accelerated since the beginning of the year by the Tax Administration, considering the accumulated amounts of requests for refunds from the previous period.

Consolidated budget expenditure (total expenditure less debt repayment) amounted to 248.44 million euros or 3.53% of GDP, which is 6.14% lower than planned, and 11.05% higher compared to the same month of the previous year. The largest absolute deviation from the plan was recorded for reserves (a decrease of 9.31 million euros), while a comparison with July of the previous year shows that the largest absolute deviation for pension and disability insurance rights (an increase of 14.48 million euros), was caused by an increase in the minimum pensions.

The highest execution of expenditures was recorded with pensions (61.55 million euros) and gross earnings (56.27 million euros).

Capital expenditure reached 21.93 million euros in July this year.

The Budget of Montenegro recorded a *surplus* of 11.52 million euros or 0.16% of GDP in July 2024.

⁴ Ministry of Finance: Estimated GDP for 2024 amounts to 7,279.70 million euros.

Aukcije državnih zapisa u ime Vlade Crne Gore obavlja Centralna banka Crne Gore kao fiskalni agent. Na aukcijama mogu učestvovati domaća i strana pravna i fizička lica. Do sada su se održavale aukcije ročnosti od 28, 56, 91 i 182 dana.

Tržište kapitala

Tabele 4.1 – 4.3 - [preuzmi tabele](#)

Izvor podataka o poslovanju učesnika na tržištu kapitala je Montenegroberza.

Tabela 4.1

U tabeli su prikazani podaci o vrijednosti realizovanog prometa na berzi, vrstama prometa (primarni i sekundarni) kao i strukturi prometovanog materijala.

Podaci o prometu akcijama uključuju podatke o akcijama kojima se trgovalo na berzanskom i slobodnom tržištu. Akcije na berzanskom tržištu obuhvataju akcije kompanija s berzanskih lista (A i B liste Montenegroberze), Akcije na slobodnom tržištu uključuju akcije kojima se trgovalo u slobodnoj prodaji i akcije iz specijalnih ponuda Ministarstva fi-

nansija i državnih fondova (akcije privrednih društava u državnom vlasništvu – djelimičnom ili potpunom, koje se obično nude na prodaju prilikom privatizacije ili preuzimanja).

Raznim vrstama obveznica trguje se na berzanskom i slobodnom tržištu. Trgovina obveznicama odnosi se na: restitucije i obveznice stare devizne štednje (uključujući i obveznice za obeštećenje štediša kod državnih banaka sa sjedištem van Crne Gore), koje je emitovalo Ministarstvo finansija u cilju regulisanja obaveza po osnovu stare devizne štednje građana i obaveza po osnovu restitucije, obveznice korisnika penzijskog osiguranja koje je takođe emitovalo Ministarstvo finansija u svrhu obeštećenja korisnika penzijsko invalidskog osiguranja, obveznice opština, koje su emitovale brojne crnogorske opštine, obveznice za sanaciju drumskih puteva koje emituje Vlada RCG, državne i korporativne obveznice.

Akcijama Fondova zajedničkog ulaganja trguje se na slobodnom tržištu Montenegroberze. U periodu od 2002. do 2004. godine, prikazan je promet investicionim jedinicama privatizacionih investicionih fondova, kao i specijalnih investicionih jedinica privatizacionih fondova kojima su privatizacioni fondovi „isplaćivali“ menadžment kompanije za upravljanje fondovima. Tokom 2005. godine, privatizacioni investicioni fondovi su se transformisali u fondove zajedničkog ulaganja⁵, tako da se u pregledima, od tog perioda, prati promet akcijama fondova zajedničkog ulaganja.

Tabela 4.2

Tržišna kapitalizacija i koeficijent obrta sredstava na Montenegroberzi.

Tržišna kapitalizacija na Montenegroberzi računa se kao suma ukupnog broja emitovanih hartija od vrijednosti svakog pojedinačnog emitenta, pomnoženih s posljednjom cijenom trgovanja (bez obzira na to kad se njome trgovalo). Koeficijent obrta sredstava računa se kao odnos ostvarenog prometa i tržišne kapitalizacije na kraju svakog mjeseca.

Tabela 4.3

Indeksi predstavljaju repere tržišnog prosjeka na osnovu kojeg investitori definišu investicionu strategiju i upoređuju prinos na svoj portflijo. Berzanski indeksi koji se računaju na crnogorskoj berzi su: MONEX i MNSE10. Metodologija izračunavanja indeksa MONEX i MNSE10 usvojena je od strane Odbora direktora Montenegroberze, dana 26.03.2015. godine.

MONEX je indeks ponderisan tržišnom kapitalizacijom koja se nalazi u slobodnom prometu (free float) i koji se ne prilagođava za isplaćene dividende i nije zaštićen od dilutacionog efekta koji se javlja usled isplate dividendi. Broj emitenata čije akcije ulaze u sastav indeksa MONEX zavisi od broja emitenata na uređenom tržištu Montenegroberze i broja emitenata koji ispunjavaju posebne kriterijume. Opšti uslov koji emitent mora da ispuni da bi njegove akcije bile uključene u sastav indeksa je da su iste uvrštene na Berzansko ili Slobodno tržište Berze (u skladu sa Pravilnikom o kotaciji Montenegroberze). Posebni kriterijumi su formirani sa ciljem da u sastav indeksa MONEX budu uključene akcije emitenata koje se na najbolji način odražavati kretanje cijena na crnogorskom tržištu kapitala.

Index MNSE10 je težinski indeks koji se ne prilagođava za isplaćene dividende i nije zaštićen od dilutacionog efekta koji se javlja usled isplate dividendi. U sastav indeksa ulaze akcije 10 kompanija sa najvećim koeficijentom likvidnosti. U njegov sastav mogu ući i akcije kompanija rangirane ispod desetog mjesta, ukoliko se nalaze u top dvadeset kompanija

stock exchanges). Free market shares include shares traded in free sale and shares of special offers of the Ministry of Finances and state funds (shares of state companies – partial of full ownership), which are usually offered for the sale through privatization or acquisition).

Different kinds of bonds are traded at stock exchange and free market. Trade with bonds refers to: restitutions and frozen foreign currency savings bonds (including bonds from indemnification of depositors with state banks settled out of Montenegro), issued by the Ministry of Finance with a view to regulating obligations derived from frozen foreign currency savings of citizens and obligations from restitution, bonds of pension insurance beneficiaries also issued by the Ministry of Finance aiming to indemnify pension and disability insurance beneficiaries, municipalities' bonds issued by numerous Montenegrin municipalities and bonds for roads reconstruction issued by the Government of Montenegro, sovereign and corporate bonds.

Joint investment funds' shares are traded at free market of both Montenegrin stock exchanges. Turnover of investment units of privatization-investment funds, by which privatization funds „paid“ management companies for managing funds is shown for the period 2002-2004. In 2005, privatization-investment funds were transformed into joint investment funds⁵. Thus, in the overviews as of that period, turnover of joint investment funds share is observed.

Table 4.2

Market capitalization and asset turnover ratio at the Montenegro stock exchange

Market capitalization at the Montenegro stock exchange is a sum of the total number of issued securities of each issuer, multiplied with the latest trading price (regardless of the trading period). Asset turnover ratio is recorded turnover and market capitalization ratio at the end of each month.

Table 4.3

Indices represent parameters of the market average on the basis of which investors define investment strategy and compare return on their portfolio. Stock exchange indices listed at Montenegrin stock exchange are the following: MONEX and MNSE10. Methodology for calculating index MONEX and MNSE10 was adopted by the Board of Directors of the Montenegro Stock Exchange on March 26, 2015.

MONEX is index weighted by the free float market capitalization and which does not adjust itself to the paid dividends and is not protected from the dilution effect which occurs due to dividends payments. Number of issuers whose shares are included in the index MONEX depends on the number of issuers on the regulated market and the number of issuers who meet specific criteria. The general condition which must be met by the issuer in order that its shares are included in the composition of the index is that the shares are included in the Official or Free market segment of the Stock Exchange (in accordance with the Listing rules of the Montenegro Stock Exchange). Specific criteria were formed with the aim of including share of issuers in the composition of the index MONEX, which will reflect the price movement on the Montenegrin market in the best possible way.

MNSE10 represents weighted index which is not adapted for paid dividends and which is not protected from the dilutive effect which occurs due to the dividend payout. MNSE10 is comprised of the shares of 10 companies with highest liquidity ratio. MNSE10 can also

rangiranih po koeficijentu likvidnosti, a kao dodatni kriterijum razmatra se finansijsko poslovanje kompanije i učešće emitenta u free float kapitalizaciji. Učešće akcija pojedinog emitenta određeno je free float tržišnom kapitalizacijom, pri čemu učešće free float tržišne kapitalizacije pojedine akcije u ukupnoj free float tržišnoj kapitalizaciji indeksa MNSE10, na dan redovne revizije, ne može biti veći od 20%.

Platni bilans

Tabele 5.1 – 5.4 - *preuzmi tabele*

Platni bilans Crne Gore sastavlja se u skladu s novom metodologijom Međunarodnog monetarnog fonda (Balance of Payments and International Investment Position Manual, Sixth edition, IMF, 2009). Izvori podataka su: poslovne banke (ITRS), MONSTAT, CBCG i statistička istraživanja koja sprovodi CBCG. Podaci se objavljuju kvartalno, u eurima. Preračunavanje izvornih podataka iz originalnih valuta u izvještajnu valutu vrši se primjenom: srednjih kurseva CBCG na dan transakcije, mjesečnih i godišnjih srednjih prosječnih kurseva CBCG, srednjeg dnevnog kursa na kraju perioda kod procjene transakcija čija se razlika stanja prati.

Početakom 2005. godine izvršena je revizija podataka o spoljnoj trgovini robama za 2004. godinu. Naime, tokom 2004. godine postalo je tehnički moguće pratiti robne transakcije između Crne Gore i Srbije na osnovu podataka Republičke uprave carina Crne Gore, odnosno carinskih deklaracija. Do 2004. godine izvor za praćenje ovih tokova bili su podaci poslovnih banaka o ostvarenom platnom prometu s inostranstvom, odnosno ITRS. Izvor podataka o spoljnoj trgovini od 2005. godine je MONSTAT, i CBCG koristi podatke o izvozu i uvozu robe prikazane po specijalnom sistemu trgovine. CBCG radi prilagođavanje podataka dobijenih od MONSTAT-a za potrebe izrade platnog bilansa u skladu sa novom metodologijom Međunarodnog monetarnog fonda (Balance of Payments and International Investment Position Manual, sixth edition, IMF, 2009). Podaci o izvozu i uvozu roba prikazani su na f.o.b. osnovi.

Na računu usluga evidentiraju se podaci o uslugama u oblasti transporta, putovanja–turizma i ostalih usluga. Podaci o izvozu i uvozu usluga dobijaju se iz platnog prometa sa inostranstvom. Prihodi od putovanja–turizma obuhvataju procijenjene prihode od turizma, koji se dopunjavaju podacima o pruženim zdravstveno–rekreativnim uslugama i potrošnjom u cilju školovanja. Procjena prihoda od turizma radi se na osnovu broja noćenja (podatak MONSTAT-a) i procijenjene prosječne dnevne potrošnje. U toku 2012. godine korišćen je model za procjenu prihoda od turizma i izvršena je revizija podataka za prethodne godine. Ostale usluge obuhvataju građevinske usluge, proizvodne usluge na fizičkim inputima u vlasništvu drugih, usluge remonta i opravke, usluge osiguranja i penzione usluge, finansijske usluge, naknade za korišćenje intelektualne svojine, telekomunikacione, računarske i informatičke usluge i ostale poslovne usluge. Podaci o ovim uslugama dobijaju se iz statistike platnog prometa s inostranstvom (ITRS), dok se za FISIM koji je dio finansijskih usluga radi procjena.

Račun primarnog dohotka obuhvata naplate i plaćanja po osnovu kompenzacija zaposlenima, dohodaka o ulaganja (direktnih, portfolio i ostalih ulaganja) i ostale primarne dohotke. Izvor podataka je statistika platnog prometa s inostranstvom, CBCG i procjene. Sekundarni dohoci obuhvataju podatke o transferima sektora vlade i ostalih sektora koji se dobijaju iz statistike platnog prometa s inostranstvom.

Direktne i portfolio investicije prate se na osnovu podataka statistike platnog prometa s inostranstvom i sprovedenih istraživanja. Ostale investicije, koje obuhvataju podatke o

include shares of companies ranked below 10th place, if they are in the top twenty companies ranked by liquidity ratio, whereby financial operations of the company and the share of the issuer in free float capitalisation is taken into consideration. The share of shares of individual issuer is determined by free float market capitalisation, whereby the share of free float market capitalisation of an individual share in total free float market capitalisation of MNSE10, as at regular review may not exceed 20%.

Balance of Payments (BoP)

Tables 5.1 - 5.4 - [download tables](#)

Balance of payments of Montenegro is compiled according to the new IMF methodology (Balance of Payments and International Investment Position Manual, sixth edition, IMF, 2009). Data sources are: commercial banks (ITRS), MONSTAT, the CBCG and statistical surveys of the CBCG. Data are published on quarterly basis, in euros. Recalculation of source data from original currencies to reporting currency is performed as follows: by the implementation of middle exchange rates of CBCG at the transaction day, monthly and annual middle average exchange rates of CBCG, middle daily exchange rate at period-end in the assessment of transactions which difference is being monitored.

At the beginning of 2005, revision of data on visible trade for 2004 was performed. Namely, in 2004, it became technically plausible to monitor commodity transactions between Montenegro and Serbia by using data of the Montenegrin Custom Administration or custom declarations. Up to 2004, source for monitoring these flows were data of commercial banks on recorded foreign payment operations (ITRS). MONSTAT represents the data source for visible trade as of 2005 and CBCG uses data on export and import of goods according to the special trade system. The CBCG makes adjustments of MONSTAT data to the needs of BoP according to the new IMF methodology (Balance of Payments and International Investment Position Manual, Sixth edition, IMF, 2009). Both exports and imports of goods are shown on f.o.b. basis.

Services account records data on services in the sectors of transportation, travel-tourism and other services. Data on export and import of services are obtained from foreign payment operations. Revenues from travel-tourism comprise estimations of revenues from tourism, supplemented with data on health related and education related services. Estimation of revenues from tourism is performed on the basis of the number of overnight stays (MONSTAT data) and estimated average daily expenditure. During 2012, model for the estimation of revenues from tourism was changed and revision of data for previous years was performed. Other services cover construction, manufacturing services on physical inputs owned by others, maintenance and repair services, insurance and pension services, financial services, charges for the use of intellectual property, telecommunications, computer, and information services and other business services. Data on these services are obtained from the foreign payment operations statistics (ITRS), while FISIM which is part of financial services is estimated.

Primary income account comprises data on payments and collections on compensation of employees, investment income (direct, portfolio and other investment) and other primary income. Data source is foreign payment operations statistics (ITRS), the CBCG and its estimations. Secondary income account comprises data on transfers of the Government and other sectors which are obtained from foreign payment operations statistics.

Direct and portfolio investments are monitored according to foreign payment operations statistical data (ITRS) and conducted surveys. Other investments, which cover data for

kreditima, trgovinskim kreditima, gotovini i depozitima, dobijaju se iz statistike platnog prometa s inostranstvom, CBCG i Ministarstva finansija i socijalnog staranja.

Rezerve Centralne banke Crne Gore obuhvataju sredstva Centralne banke deponovana kod ino banaka, sredstva u trezoru CBCG i rezervne pozicije kod MMF-a. Izvor podataka je CBCG (monetarna statistika).

Platni promet

Tabele 6.1 – 6.8⁶ - [preuzmi tabele](#)

Platni promet u RTGS sistemu i DNS sistemu obuhvata vrijednost relizovanu izvršavanjem platnih transakcija između učesnika u Platnom sistemu Centralne banke, posredstvom RTGS sistema i DNS sistema, čiji je vlasnik i operater Centralna banka Crne Gore.

Učesnici u platnom sistemu Centralne banke su:

1. Banke (trenutno 11 banaka)
2. Državni organi (Državni trezor, Uprava carina, Poreska uprava, MUP i Uprava policije)
3. Ostali učesnici (banke u stečaju i likvidaciji, Centralna depozitarna agencija i Fond za zaštitu depozita) i
4. Centralna banka.

U RTGS sistemu obavezno se izvršavaju:

- platne transakcije koje glase na iznos od 1.000,00 EUR ili veći,
- platne transakcije koje se odnose na uplatu javnih prihoda (porezi, doprinosi, takse, itd.) na transakcione račune koje propisuje ministarstvo nadležno za poslove finansija i platne transakcije u korist i na teret transakcionog računa Državnog trezora,
- platne transakcije kojima učesnici podižu gotov novac kod Centralne banke Crne Gore,
- platne transakcije koje ispostavlja DNS sistem po osnovu negativne neto pozicije.

Po zahtjevu korisnika platnih usluga, u RTGS sistemu se mogu izvršavati i platne transakcije koje glase na iznos manji od 1.000,00 EUR.

U DNS sistemu, u tri klirinška ciklusa se izvršavaju platne transakcije koje glase na iznos manji od minimalne vrijednosti platnih transakcija koje moraju biti procesuirane u RTGS sistemu, utvrđene propisom Centralne banke.

⁶ Od januara 2018. godine Centralna banka Crne Gore objavljuje podatke o realizovanom platnom prometu u Platnom sistemu Centralne banke Crne Gore (RTGS sistemu i DNS sistemu) – tabele 6.7 i 6.8. Do 31.12.2017. godine, prikupljanje podataka o internom (unutarbankarskom) platnom prometu vršilo se u skladu sa Odlukom o izvještajima koji se dostavljaju Centralnoj banci Crne Gore ("Sl. list Crne Gore br. 64/12) – [tabele 6.1 – 6.6](#). Odlukom o izvještajima koji se dostavljaju Centralnoj banci Crne Gore o platnom prometu ("Sl. list Crne Gore, broj 82/17), podaci o platnom prometu prikupljaće se na kvartalnom nivou.

loans, trade credits, currency and deposits, are obtained from foreign payment operation statistics, CBCG and Ministry of Finance and Social Welfare.

The CBCG reserve assets comprise the CBCG funds deposited in foreign banks, funds in CBCG vault, and reserve positions with the IMF. Source of data is CBCG (monetary statistics).

Payment System Transactions

Tables 6.1 – 6.8⁶ - [download tables](#)

The payment transactions in the RTGS and the DNS systems include the value achieved through the execution of payment transactions between the participants in the Central Bank of Montenegro Payment System, by means of the RTGS and DNS systems, which are owned and operated by the Central Bank of Montenegro.

Participants in the Central Bank of Montenegro Payment System are the following:

1. banks (currently eleven banks)
2. government bodies (Treasury, Customs Administration, Tax Administration, Ministry of Internal Affairs and Police Administration)
3. other participants (banks under bankruptcy and liquidation, the Central Depository Agency, and the Deposit Protection Fund), and
4. the Central Bank.

Transactions that must be performed in RTGS are the following:

- payment transactions in the amount of 1,000.00 euros or more,
- payment transactions involving the payment of public revenues (taxes, contributions, duties, etc.) to the current accounts prescribed by the ministry responsible for financial affairs and payment transactions to credit and debit the State Treasury,
- payment transactions through which the participants withdraw cash from the Central Bank of Montenegro,
- payment transactions delivered by the DNS system based on negative net position.

Payment transactions lower than 1,000.00 euros may be processed within the RTGS system at a payment service user's request.

In three clearing cycles, the DNS system executes all payment transactions in the amount lower than the minimum value of payment transactions that have to be processed in the RTGS system, determined by the regulation adopted by the Central Bank.

⁶ As of January 2018, the Central Bank of Montenegro publishes data on the payment transactions executed within the Central Bank of Montenegro Payment System (RTGS and DNS systems) – tables 6.7 and 6.8. Up to 31 December 2017, the collection of data on the interbank payment transactions was performed pursuant to the Decision on Reports to be submitted to the Central Bank of Montenegro (OGM 64/12) – [tables 6.1 – 6.6](#). The Decision on Payment System Reporting to the Central Bank of Montenegro (OGM 82/17), data on payment system shall be collected on the quarterly level.

Realni sektor

Tabele 7.1 – 7.6 - *preuzmi tabele*

Statistički podaci iz oblasti realnog sektora prikupljaju se od nadležnih institucija: MONSTAT, Zavoda za zapošljavanje i Ministarstva finansija i socijalnog staranja.

Tabela 7.1 – Cijene

Podaci o indeksima potrošačkih cijena (CPI), harmonizovanim indeksima potrošačkih cijena (HICP) i cijena proizvođača industrijskih proizvoda preuzimaju se od MONSTAT-a.

Indeks potrošačkih cijena definiše se kao mjera prosječne promjene cijena fiksne korpe proizvoda i usluga koje domaćinstvo kupuje radi zadovoljenja svojih potreba, i obračunava se po metodologiji usklađenoj s preporukama za obračunavanje indeksa cijena u Evropskoj uniji. Dok se indeks potrošačkih cijena najčešće primjenjuje kao opšta mjera inflacije u nacionalnim okvirima, harmonizovani indeks potrošačkih cijena (HICP) predstavlja uporedivu mjeru inflacije sa zemljama Evropske unije. Za obračun oba indeksa se koristi ECOICOP klasifikacija (Evropska klasifikacija individualne potrošnje prema namjeni). Lista proizvoda i usluga MONSTAT redovno revidira kako bi se očuvala njena reprezentativnost u pogledu strukture potrošnje i navika potrošača.

Cijene proizvođača industrijskih proizvoda su cijene po kojima proizvođači prodaju svoje proizvode u najvećim količinama na domaćem tržištu. Ove cijene se prikupljaju mjesečnim izvještajima koje dostavljaju izabrana preduzeća. Uzorak i ponderi su bazirani na godišnjem istraživanju Industrijske proizvodnje (PRODCOM). Proizvođači su odabrani kao najveći proizvođači kategorija proizvoda koje su uključene u istraživanje.

Tabela 7.2 – BDP (Bruto domaći proizvod)

Podaci o Bruto domaćem proizvodu se preuzimaju od MONSTAT-a, a procjene BDP-a se preuzimaju od Ministarstva finansija i socijalnog staranja.

Tabela 7.3 – Industrijska proizvodnja

Indeksi fizičkog obima industrijske proizvodnje dobijaju se na osnovu mjesečnih podataka MONSTAT-a. Obuhvataju se preduzeća kao i njihovi dijelovi koji obavljaju industrijsku djelatnost, odnosno koji su prema Klasifikaciji djelatnosti razvrstani u sektore: Vađenje ruda i kamena, Prerađivačka industrija i Snabdijevanje električnom energijom, gasom, parom i klimatizacija. Preduzeća neindustrijskih djelatnosti su izvještajne jedinice, ako u svom sastavu imaju jedinicu koja se bavi industrijskom djelatnošću.

Tabela 7.4 – Šumarstvo, građevinarstvo

Proizvodnja šumskih sortimenata je dobijena na osnovu mjesečnih podataka MONSTAT-a. Obuhvaćena su preduzeća koja u državnim šumama vrše proizvodnju šumskih sortimenata, tj područne jedinice Uprave za šume.

Podaci o građevinarstvu prikupljaju se na osnovu kvartalnih izvještaja MONSTAT-a. Obuhvaćena su preduzeća iz oblasti građevinarstva, kao i jedinice koje obavljaju građevinsku djelatnost, a nalaze se u sastavu negrađevinskih preduzeća. Vrijednost izvršenih građevinskih radova izražena je u tekućim cijenama i obuhvata: troškove materijala, troškove rada, troškove rušenja, pripremu terena, troškove instalacija, opšte troškove i profit. Podaci o vrijednosti izvršenih građevinskih radova odnose se na radove izvedene u izvještajnom

Real Sector Developments

Tables 7.1 – 7.6 - [download tables](#)

Statistical real sector data are collected from the following authorized institutions: MONSTAT, the Employment Agency, and the Ministry of Finance and Social Welfare.

Table 7.1 – Prices

Data on the consumer price (CPI), harmonised consumer prices (HICP) and the producers' prices of manufactured products indices are taken from MONSTAT.

The consumer prices index (CPI) is defined as a measure of the average change over time in the prices of a market basket of consumer goods and services paid by households with a view to meeting their needs and it is calculated in line with the methodology harmonized with the recommendations for the calculation of the CPI in the European Union. While the consumer price index is mostly used as a general measure of inflation in the national context, the harmonised index of consumer prices represents a comparable measure of inflation in the European Union. ECOICOP (European Classification of Individual Consumption according to Purpose) is used for both indices. The list of products and services MONSTAT regularly updated in order to preserve its representative characteristics regarding structure of consumption and consumers' habits.

Producers' prices of manufactured products are prices at which producers sell their products in the largest quantities in the local market. Data on these prices are collected from monthly reports submitted by some companies which are selected according to their share in total output of a certain industry. Sample and weights are based on annual Industrial production survey (PRODCOM). Manufacturers have been selected as the largest manufacturers of product categories that are included in the survey.

Table 7.2 – GDP (Gross Domestic Product)

Data on GDP are taken over from MONSTAT, and GDP estimates from the Ministry of Finance and Social Welfare.

Table 7.3 – Industrial Output

The indices of physical volume of industrial production are obtained on the basis of monthly MONSTAT data. They cover enterprises and their units that perform that industrial activity, i.e. those classified in accordance with the Classification of Activities into: Mining and quarrying, Manufacturing industry, and Electricity, gas, steam and air conditioning supply. Enterprises performing non-industrial activities are reporting entities if they contain a kind-of-activity unit performing an industrial activity.

Table 7.4 – Forestry, Construction

The production of wood products is obtained on the basis of MONSTAT monthly data. It covers all business entities that carry out the production of forest assortments in the state forests, ie local units of the Forest Administration.

Data on construction are compiled from MONSTAT quarterly reports. It covers enterprises in construction, as well as kind-of-activity units of non-construction enterprises which perform construction activities. The value of performed construction work is presented in current prices and including: material costs, labour costs, demolition and preparation of field, installation costs, general costs and profit. Data on the value of performed construc-

Tabele 7.5 i 7.5.1 – Turizam

Podaci o turističkom prometu u kolektivnom smještaju (broj dolazaka i noćenja turista) prikupljaju se iz redovnih mjesečnih izvještaja MONSTAT-a koji se sastavljaju na osnovu evidencije u knjigama gostiju u smještajnim objektima kolektivnog smještaja. Zavod za statistiku Crne Gore je do 2017. godine publikovao mjesečne podatke o ukupnom turističkom prometu. (Tabela 7.5.). Prema EU Regulativi 692/2011 o evropskoj statistici turizma, od Februara 2017. godine MONSTAT na mjesečnom nivou objavljuje podatke o dolascima i noćenjima turista samo za kolektivni smještaj (Tabela 7.5.1.). Zbog nacionalnog interesa za ukupnim podacima o dolascima i noćenjima turista MONSTAT ih objavljuje na godišnjem nivou.

Tabela 7.6 – Zaposleni, nezaposleni, zarade

Podaci o broju zaposlenih preuzimaju se od MONSTAT-a, pri čemu se podaci o godišnjem i mjesečnom broju zaposlenih dobijaju na osnovu evidencija koje su regulisane Zakonom o evidencijama u oblasti rada i zapošljavanja („Sl.list CG” br 45/12), a vode se u Centralnom registru obveznika i osiguranika (CROO), Službeni list CG (45/08; 80/08; 15/09; 43/09; 32/10), koje Uprava za statistiku redovno preuzima od istih.

Podaci o broju nezaposlenih preuzimaju se od Zavoda za zapošljavanje Crne Gore.

Podaci o prosječnim zaradama preuzimaju se od MONSTAT-a. Pod pojmom zarada zaposlenog podrazumijeva se bruto zarada koja obuhvata zaradu za obavljani rad i vrijeme provedeno na radu, uvećanu zaradu, naknadu zarade i druga lična primanja, koja podliježu plaćanju poreza na dohodak fizičkih lica utvrđena zakonom, kolektivnim ugovorom i ugovorom o radu. Prosječna zarada izračunava se tako što se ukupno isplaćena masa zarada u mjesecu dijeli s brojem zaposlenih na koje se odnose izvršene isplate. Zaradu bez poreza i doprinosa (neto) čini zarada (bruto) umanjena za poreze i doprinose na teret zaposlenog.

Fiskalni sektor

Tabele 8.1 – 8.5 - *preuzmi tabele*

Izvor podataka o kretanjima u fiskalnom sektoru je Ministarstvo finansija i socijalnog staranja Crne Gore i državni fondovi (Fond PIO, Zavod za zapošljavanje, Fond za zdravstveno osiguranje, Fond za obeštećenje, Fond rada).

Tabela 8.1

Tabela obuhvata ostvarene godišnje primitke i realizovane izdatke Budžeta CG i državnih fondova u skladu sa Zakonom o budžetu i fiskalnoj odgovornosti („Sl.list CG“, br. 20/14, 56/14, 70/2017, 4/2018, 55/2018, 66/2019 i 70/2021).

Primitke predstavljaju izvorni prihodi (porezi, doprinosi, takse, naknade, ostali budžetski prihodi, primici od otplate dodijeljenih kredita i sredstva prenesena iz prethodne godine, donacije i transferi), primici od prodaje imovine i pozajmice i krediti od domaćih i inostranih izvora.

tion work refer to works performed in the reporting period on finished and unfinished constructions. Performed effective hours represent the real regular and overtime working hours of hired construction workers.

Tables 7.5 and 7.5.1 – Tourism

Data on tourist turnover in collective accommodation (number of arrivals and overnight stays) are collected from MONSTAT regularly monthly reports which are compiled on the basis of guest book records in the collective accommodation establishments. Statistical Office was published monthly data of total tourist turnover until 2017 (Table 7.5.). According to EU Regulation 692/2011 on European statistics on tourism, from February 2017 MONSTAT only publishes monthly data on tourist arrivals and overnight stays in collective accommodation (Table 7.5.1.). Taking into consideration the national interests for the data on the total number of arrivals and overnight stays, Statistical Office publishes them annually.

Table 7.6 – Employment, Unemployment, Salaries

Data on employment are taken from MONSTAT, whereas the data on annual and monthly number of employees are obtained on the basis of records regulated by the Law on Records in Area of Labour and Employment (Official Gazette of Montenegro 45/12), and kept by the Central Register of Payers and Insured Persons (Official Gazette of Montenegro 45/08, 80/08, 15/09, 43/09, 32/10), and regularly used by Statistical Office.

Data on unemployment are taken from the Montenegrin Employment Agency.

Data on average monthly salaries are taken from MONSTAT. The term “employee’s salary” means gross wages including the wages earned for the performed work and hours spent at work, increased salaries, compensations, and other personal income, subject to paying tax on physical persons’ income as determined by the Law, the Collective Agreement or the Employment Contract. An average salary is calculated as the total amount of paid salaries in a month divided by the number of employees that have received the salary. Net salaries and wages are tax and contributions deducted (gross) salaries and wages.

Fiscal Sector

Tables 8.1 – 8.5 - [download tables](#)

Data source for fiscal sector trends is the Ministry of Finance and Social Welfare of Montenegro and the State funds (Pension and Disability Insurance Fund, Employment Bureau, Health Care Fund, Restitution Fund, Labour Fund).

Tables 8.1

The table covers realized annual revenues and expenditures of Montenegro’s Budget and the State funds in line with the Budget and Fiscal Accountability Law (OGM, 20/14, 56/14, 70/2017, 4/2018, 55/2018, 66/2019 i 70/2021).

Revenues cover source revenues (taxes, contributions, duties, fees, other budget revenues, revenues from loan repayment and funds carried over from previous year, donations and transfers), revenues from the sale of assets, borrowings and loans from domestic and foreign sources.

Izdatke čine konsolidovani izdaci i transakcije finansiranja. U konsolidovane izdatke spadaju: tekući izdaci, transferi za socijalnu zaštitu, transferi institucijama, pojedincima, nevladinom i javnom sektoru, kapitalni izdaci za nabavku i investiciono održavanje finansijske i nefinansijske imovine, pozajmice i krediti, rezerve, otplata garancija i obaveza iz prethodnog perioda. Transakcije finansiranja uključuju otplatu dugova i izdatke za kupovinu hartija od vrijednosti.

Tabela 8.2

Tabela prikazuje ostvarene godišnje primitke i realizovane izdatke državnih fondova.

Tabela 8.3 - 8.4

U tabelama su prikazani ostvareni mjesečni izvorni prihodi i konsolidovani izdaci Budžeta CG.

Tabela 8.5

Tabela obuhvata kvartalne podatke za državni dug i godišnje podatke za javni dug, koji pokazuju stanje duga na kraju perioda.

U skladu sa Zakonom o budžetu i fiskalnoj odgovornosti, javni dug je definisan kao dug centralnog nivoa države (državni dug) i lokalnog nivoa (dug lokalne samouprave). Centralni nivo države su državni organi i organi državne uprave, pravna lica i privredna društva koja pretežno pružaju usluge od javnog interesa koja su pod upravljačkom kontrolom i najvećim dijelom finansirana od države. Lokalni nivo su organi opštine, pravna lica i privredna društva koja pretežno pružaju usluge od lokalnog interesa i koja su pod upravljačkom kontrolom i najvećim dijelom finansirana od opštine.

Podaci za državni dug raspoloživi su na kvartalnom, dok su podaci za javni dug raspoloživi na godišnjem nivou.

Expenditures cover consolidated expenditures and financing transactions. Consolidated expenditures include: current expenditures, social insurance transfers, transfers to the public sector, institutions, individuals and NGOs, capital expenditures for procurement and investment maintenance of financial and nonfinancial assets, borrowings and loans, reserves, repayment of guarantees and liabilities from the previous period. Financing transactions include debt repayment and expenditures for repayment of securities.

Tables 8.2

The table shows realized annual revenues and expenditures of the State funds.

Tables 8.3 – 8.4

Tables show realized monthly source revenues and consolidated expenditures of Montenegro's Budget.

Table 8.5

Table covers government debt data on a quarterly basis and public debt data on annual basis (outstanding amount of debt at the end of the period).

In accordance with the Law on Budget and Fiscal Responsibility, public debt is defined as the debt of central government level (government debt) and local level (debt of local self-government). Central Government Level includes the State authorities and State administration authorities, legal entities and business organisations predominantly providing services of public interest which are controlled and mostly financed by the State. Local Government Level includes the municipal authorities, legal entities and business organisation predominantly providing services of local interest and which are controlled and mostly financed by the municipalities.

Data on government debt are available on a quarterly basis, while public debt data are available on an annual basis.
